The atmosphere continuing serses, the party were lulled into a feeling of security, and ventured further than usual upon the ice, in the hope of obtaining a good haul. Suddenly a breeze sprung up from the east, which, growing boisterous by degrees, whirled the losses and fine particles of ice in all directions, and before long succeeded in detaching the ice from the So it has come to pass that all promised results of Democratic Conventions have fallen through. But it was thought and fondly believed by the Democracy, that the plans were laid for a good thing yesterday—they expected it.

Pursuant to the call in the papers, there was a gathering in front of Mechanics' institute Hall, at 2 P. M. yesterday, for the Peoples' Convention. The hour passed on, and "the People" swoke to find that by some oversight, or too careful a sight, everybody had personally avoided the responsibility of hiring the Hall.

The doors were fast, the Hall was employed for another purpose. "Try Light Guard Hall," said one; and directly a score of the People were in search of the one who said it, but he

If such was the case it need not give rists one describe sense. case it need not give rise to any alarm, the same will not occur again. The Democracy will scarcely again achieve a similar meeting. We don't blame the sun for stopping. The Democracy doubtless would hold up both hands to have him go back and begin yesterday over again.

The People's Convention was to come off yesterday. A gathering was to be held, at which Democratic aspirants were to caper and giggle, and get nominated under a thin veneer variegated with sore headed Republicans.

The twin "Regencies" were to strike hands together. The Democracy were to insist on candidates without party principles, and select the same from their own ranks under the cheap dodge, that principles form no part of their creed. All was to be happy, jolly and entirely successful. The people were to do it all.

It is rumored that the meeting referred to was held in the look-out of the Court House bellman, for the aske of being above the party nomination going on beneath. We shall ace what will become of the People's Meeting. The history of the People's Convention is written, portrayed it could not be, a fixtle and farce, only anusing to lookers on. GREAT BRITAIN AND FRANCE.

The Daily Telegraph says: We have the best authority for stating that an important movement has taken place amongst the leaders of the Liberal party. Lord Palmers on and Lord John Russell have agreed to lay aside their fittle differences, and go warmly in against the Gov. From the Comment Reform Bill. The questions now to be determined are, whether a meeting of the friends of the new measure is to be called, and which of thenoble lords is to convene it. If it be held at Lord John's, it is understood that Lord Palmerston will attend.

The Star confirms this, and states that there will probably be a meeting at Lord John Russel's on the 14th instant, to confer as to the course to be taken by the Liberal party on the Government Reform Bill.

The Emperor Napoleon has addressed a letter to Sir Francis Head, thanking him for his excitions in the imperial canse. His Majesty expressed his surprise that the English should attack him incessantly in the journals in the most unjust manner, as he has been their loyal all. The correspondence appears in the Times.

The London Times in its City Article, has some satirical remarks upon the recent Message of Gov. Packer of Pennsylvania, and takes strong ground of exception to the Governor's laudatory comments on the untarnished credit of the State.

The Dasig News publishes a long and remarkable letter addressed by Signor Parini, the Italian historian and statesman, to Lord John Russell on the Italian question. It declares that the question at issue between Sardinia and Austria is not a question of reform in one State of Italy or another, nor is it a sentimental question of gatiouality. It is adual of two contending prificiples and a question of life, of bread, of house and home for thousands of exiled and suffering men. It is not so much a political as a merely humane question. He hopes England will join France in securing the cause of Italian progression. progression.

The tone of the Government journals was becoming still more belligerent, and the various correspondents of the London journals write as if was was likely to be the only solution of the difficulty.

The Paris Constitutionned says: "We learn that in consequence of the communication addressed by Cardinal Antonelli to the French Ambassador at Rome, the Emperor has ordered the immediate ovacuation by our troops of the Pontifical city," A message received here asserts that the French corps Jarmes had been forthwith withdrawn to Civital Vecceli, there to await the transport vessels which will convey the troops back to France.

The Paris correspondent of the Independence Belge writes: "To-day the council of Ministers was convoked, and presided over by the Emperor. His Majesty informed the council that the Apostolic Nuncio had officially demanded the recall of the French troops now occupying Rome, and that an affirmative reply had been given by his Majesty.

In concluding his statements he used words to this effect, 'You know, Messieurs, with what solicitude I have watched the interests of the Holy Father—what zeal I have ever displayed in protecting his dignity. To-day he believes that he is able to dispense with the assistance of my government. I have taken the resolution to bandon him to the chances to which the obstinacy of his government exposes him, in not following my disinterested counsel."

The same correspondent says: 'All persons who know the country, believe that when the French troops leave Civita Vecchia, a revolution will break out in Rome, and that the 18,000 men who compose the Pontifical army will be powerless to suppress it."

It is stated that a very ministed controversy had taken place between Prince Napoleon and Count de Persigny. The former assumed a very belligerent tone, and expressed his attention will be returned. A report was carrent that Count Cavour, the

A DALLY RELIGIOUS NEWSPAPER.—The Churchman makes the following announcement: It is reported in newspaper circles, that an enterprise is in progress for the establishment, in this city, of a new daily paper, to be conducted on strictly religious principles. It is to be started, we hear, with a capital of \$150,000, and is to be edited by James R. Spaulding, Esq., a gentleman of ability and experience, at present and for several years past connected with the Courter and Engaters, and the Rev. It is stated from Vienna that the views of the Emperor had become determinedly warlike, and he was much embitizered signing transe.

The Cabinet of Vienna had agreed to maintain 150,000 men in Lombardy, and create fortifications in all directions.

The Emperor proposed visiting hombardy. Lord Cowley was expected to leave Vienna on the 5th inst. Several banquots, souris and official, had been given in his honor.

It was stated that his first interview with the Emperor was unsatisfactory, but according to late telegrams, subsequent negotiations had led to hopes of a successful result; that it was stated in military circles that the Archduke Albrecht and Baron Hess had been made Marshala. The acquital of Busch, charged with murder of Mages, will, we fear, give a far impulse to crime and law tessences in this a well proposed that the days of the fluiday we had hisped that the days of the fluiday how-is-knife and revolver had passed, and a hereafter we might say that life is as well provided in this commercial contre as in the magnitude of the say of the

We write with feeling but let the reader turn to the instructions of the Louri—instructions conceived just and humane sestiments, and clotched language that none could misunderstand—at see what a monstrous wrong this pery h done. THE WASHINGTON'S NEWS.

We print in another coinsant the details the Knorpean news by the City of Washington The point of interest after the surmises as facts in relation to the prospect of war, is to introduction of the Reform bill in the Knorpean manner, under the ampices of the Derivariance, truder the ampices of the Derivariance, That measure, long deferred will a tract attention on this side of the water because of its prospective assimiliation of Egish institutions to those of American bird It will be noticed that the bill is opposed to the two currences in Knotish politics—the articipacy, which favors no concessions to the popular demand, and the Descorricy under the popular demand, and the Democracy under the popular demand, and the Democracy under the lead of Mr. Bruurr, which will accept nother least that universal suffrage. Doubtless the measure will give rise to a purrous struggly which nothing but the breaking out of house these on the Continent can interrupt; and one of the consequences of the contest the solution of Ministry and the retirement. Derivy is not improbable. The progress the hill will be watched with great attention in the United States where university.
